Subject: Homework #3   Advanced Database   Farah Shleemon Kamw
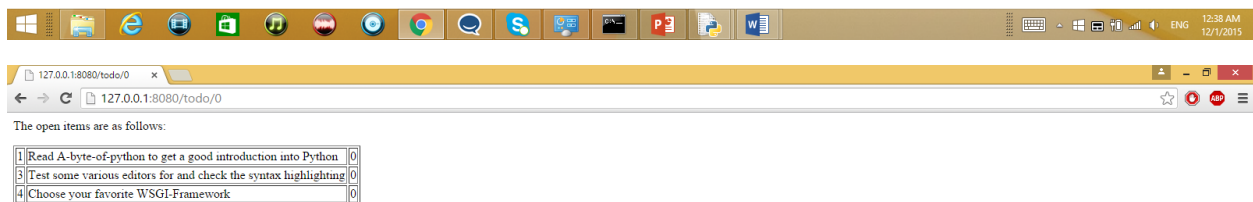

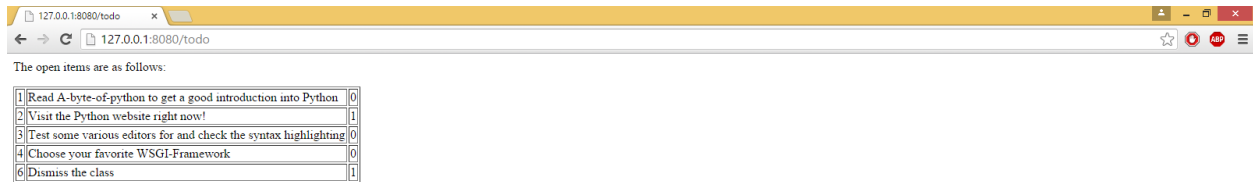

Fkamw@kent.edu

I have created a todo application using python, Bottle.py, SQLite. This application allow the user to see all records on the database, add new record to the database, and browse the database to select specific record. See the following figures.
The open items are as follows:

2	Visit the Python website right now!	1
6	Dismiss the class	1
7	Hw 4	1

Enter a new item...

To be done: This is my Third HW Save

The open items are as follows:

2	Visit the Python website right now!	1
6	Dismiss the class	1
7	Hw 4	1
8	This is my Third HW	1
